

2012 IEEE

SENSORS APPLICATIONS SYMPOSIUM

February 7-9 2012 - University of Brescia, Italy

The Symposium:

SAS-2012 provides a premier forum for sensor users and developers to meet and exchange information about novel and emergent applications in smart sensors, homeland security, biology, system health management, and related areas. Collaborate and network with scientists, engineers, developers and customers, in a balance of formal technical presentations, workshops, and informal interface meetings.

More information at <http://sensorapps.org/>

Opportunities for Sponsorship:

We present exciting opportunities for showcasing your organization during SAS-2012. We offer two levels of sponsorship:

1. **Silver:** For \$1,000 USD, your company logo will be featured prominently in the SAS-2012 website and in the printed technical program acknowledging your support of the Symposium and your connections to the sensors applications community.
2. **Gold:** For \$2,000 USD, in addition to silver-level benefits, your organization will be able to exhibit your products throughout the Symposium, and during a special Exhibitors' Event. *

Please e-mail Chris Dyer at cdyer@conferencecatalysts.com if you are interested in showcasing your company at SAS-2012 in Brescia, before October 31, 2011.

* We will provide individual tables to accommodate Sponsors' exhibits. You are welcome to bring your own easel or backdrop for displaying posters. The special Exhibitors' Event will be held during the conference lunch on Tuesday, February 7.

General Co-Chairs

Alessandra Flammini,
University of Brescia, Italy

Shreekanth Mandayam,
Rowan University, USA

Technical Program Co-Chairs

Deniz Gurkan,
University of Houston, USA

Steven Griffin,
University of Memphis, USA
